

The digitally sovereign workplace for government agencies and public institutions.

- ✓ Secure and GDPR-compliant
- ✓ Seamless integration
- ✓ For public authorities and institutions

Migration and integration

Our specialised team ensures the smooth transfer of your data to mailbox and, thanks to its many years of experience, seamlessly integrates the solution into your existing system landscape.

Training and support

To ensure that your team can use mailbox securely and efficiently, we offer practical training and personal support that also raises awareness of data protection and security.

Data protection and security

We guarantee the protection of your sensitive data with GDPR-compliant infrastructure and security concepts that meet even the high requirements of the public sector.

Customised solutions

We understand that every organisation has its own requirements. That is why we develop tailor-made solutions that fit your processes perfectly.

mailbox Suite: Efficiency at the click of a button

Mail

Every inbox spam-free and secure

Drive

Secure cloud storage for all your data

Meet

Video conferencing for productive meetings that are easy to set up

Office

Smooth collaboration, using familiar tools

Admin

Centralised account management for your business

What we do better

Secure: End-to-end encryption with PGP and S/MIME, stored in Berlin.

Made and hosted in Germany: Your data is stored securely on our own servers in Germany.

Spam filters and virus protection: Multi-level filters protect your mailbox.

Space for everything: With flexible storage space for emails and files.

Easy switching: Convenient migration service for your existing emails and contacts.

Always available for you: With individual telephone support and a 24/7 emergency hotline.

Other providers

Lack of transparency about data processing and physical server locations.

Data located outside of DE and EU, with backups on US servers.

Spam in your inbox due to weak or unreliable filters.

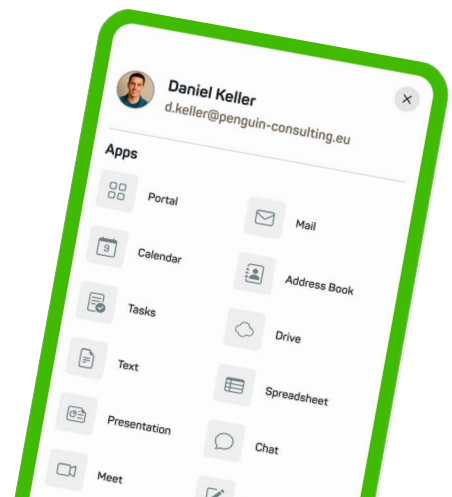

Limited storage space or hidden costs for storage expansion.

Limited switching options due to vendor lock-in.

AI chat or telephone support that is located abroad.

„Unlike the tech giants, mailbox does not engage in surveillance capitalism. The digital footprint of students is minimised. An excellent solution for schools that take the data protection and privacy of their school community seriously.“

Thomas Krupa
IT Manager Gymnasium and ORG Dachsberg
