EVAC

Business continuity with the click of a button

Your secondary communication platform
to keep you in control during an attack.

In light of increasing risk factors such as cyberattacks, it is critical to have a secure and reliable communication platform.

With EVAC, mailbox offers your company rapid communications recovery in case of emergency. EVAC strengthens your IT security and helps with meeting the requirements of the European NIS-2 Directive.

Always one step ahead.

With EVAC, you don't need to worry about losing emails. Your organisation's capability to send and receive messages is maintained in the event of a crisis. We are BSI C5-tested and ISO 27001-certified and host your data securely in redundant data centres in Germany.

Ready with a mouse click

EVAC is activated manually as soon as a threat is detected, minimizing downtime.

Access everything through one system

Email, calendar, video conferences: Your ability to communicate remains intact, no matter how severe the attack.

Secure communication

Create a protected space for your employees to continue working safely and efficiently.

Simple integration

EVAC can be seamlessly integrated into existing IT infrastructures and is instantly ready for use.

Familiar protection

State-of-the-art encryption technologies ensure that your communication remains confidential.

Business Continuity

EVAC ensures the continuous operation of your business – even in the event of serious attacks.
