

Maximum flexibility: The digital workplace that adapts to your business and grows with it.

- ✓ Efficient and location-independent
- ✓ Made and hosted in Germany
- ✓ For companies of all sizes

Data security in Europe

Your data remains in Europe and is protected by strict German data protection laws. This is how we safeguard your privacy and guarantee maximum data security.

Personal support

Our competent and experienced support team is always happy to help, and on call 24/7 for those who book our platinum package, to help your admin with any questions or challenges, and present solutions that will help your business grow.

Independent and flexible

With mailbox, you avoid vendor lock-in and being tied to a single provider. Stay flexible and retain full control over your data and IT-related decisions.

Convenient migration service

We will accompany you and assist step-by-step during your switch to mailbox. Personal onboarding ensures a smooth transition and also the seamless integration of our services into your existing infrastructure.

mailbox Suite: Efficiency at the click of a button

Mail

Every inbox spam-free and secure

Drive

Secure cloud storage for all your data

Meet

Video conferencing for productive meetings that are easy to set up

Office

Smooth collaboration, using familiar tools

Admin

Centralised account management for your business

What we do better

Secure: End-to-end encryption with PGP and S/MIME, stored in Berlin.

Made and hosted in Germany: Your data is stored securely on our own servers in Germany.

Spam filters and virus protection: Multi-level filters protect your mailbox.

Space for everything: With flexible storage space for emails and files.

Easy switching: Convenient migration service for your existing emails and contacts.

Always available for you: With individual telephone support and a 24/7 emergency hotline.

Other providers

Lack of transparency about data processing and physical server locations.

Data located outside of DE and EU, with backups on US servers.

Spam in your inbox due to weak or unreliable filters.

Limited storage space or hidden costs for storage expansion.

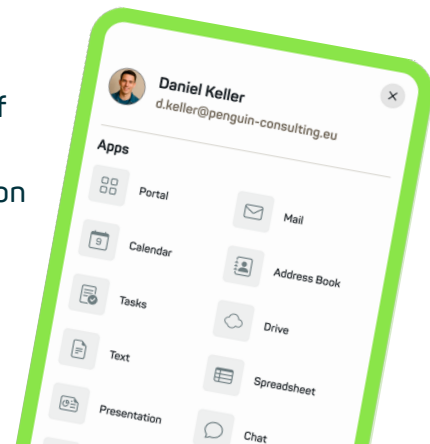

Limited switching options due to vendor lock-in.

AI chat or telephone support that is located abroad.

„Security and sovereignty in communication have never been as important as they are today. Contrary to the global trend of entrusting this communication to data giants such as Google, Facebook and Co., mailbox has created a secure communication platform that we can recommend to all our customers with a clear conscience.“

André Hermbusch, CEO
datenhain GmbH
