mailbox

EVAC

10 reasons to choose EVAC

With EVAC, mailbox's secondary communication platform, your organisation remains operational when your primary IT systems fail.

When every minute matters, EVAC keeps your organisation communicating during cyberattacks and other disruptions, supports your NIS2 requirements and helps minimise downtime.

1
Business continuity

Keep your organisation running during cyberattacks, technical faults and geopolitical risks.

2
Ready with a mouse click

Launch EVAC immediately as soon as a threat is detected.

3
Minimise impact

EVAC reduces downtime, helping to limit financial losses and legal consequences.

4
Respond to incidents faster

IT teams, management and employees stay connected, enabling quicker decisions throughout an incident.

5
Secure communication

Work securely in a protected environment, even during an active security incident.

6
Everything in one system

Email, calendar, video conferences, drive and office remain centrally available whenever you need them.

mailbox

7
Easy to implement

No major IT project required. Once user accounts have been prepared, EVAC is ready for immediate use in an emergency.

8
Digital sovereignty

Independent of US cloud providers. Your data remains in Germany and under your control.

9
Strengthen compliance

Supports your organisation's requirements for NIS2, BSI Standard 200-4 and Business Continuity Management.

10
Certified security

ISO 27001, BSI C5 certification and more than 30 years of IT expertise provide independently verified security from Germany.

About us

mailbox is operated by the Heinlein Group. For over 30 years, it has been supporting businesses, public authorities and private individuals with digital infrastructure that prioritises security, data protection and independence, and is designed to serve people.
